Education

BE CSE (8.48 CGPA)
Francis Xavier Engineering College, Tirunelveli
Sep 2017 - May 2021

12th (84%)
Cathedral Hr.Sec School, Tirunelveli
Jun 2016 - Apr 2017

10th (88%)
Cathedral Hr.Sec. School, Tirunelveli
Jun 2014 - Apr 2015

Skills

- React Js
- Next Js
- Angular Js
- Node Js
- MongoDB
- MYSQL

Professional Summary

Independent Full Stack Developer with 3.5 years of end-to-end delivery experience from requirement gathering to production deployment working across healthcare, AI, and enterprise management domains. Built and shipped 8 live applications using React, Next.js, TypeScript, Node.js, and PostgreSQL, including an OpenAI-integrated platform and a multi-module hospital management system. Comfortable owning full delivery cycles solo, collaborating with product teams in Agile environments, and integrating third-party APIs at speed.

Career Highlights

- Shipped 8 production web applications across healthcare, AI, and enterprise domains all live and publicly accessible.
- Integrated OpenAI API into a production platform (Portray 360), engineering a Python middleware layer for prompt engineering and response processing rare at 3.5 years of experience.
- Maintained zero post-launch critical defects across all freelance client engagements (Sep 2024 – present) while independently managing full project lifecycles from client brief to deployment.

Work Experiance

Independent Consultant | Remote *Sep 2024 - Present*
Freelance Full Stack Developer

- Delivered 5+ end-to-end web applications for startups and small businesses across healthcare, hospitality, and HR domains, managing full project lifecycle from client brief to production deployment.
- Engineered React/TypeScript frontends and Node.js/Express/MongoDB backends for 3 client projects, reducing average page load time by ~30% through lazy loading and API response optimisation.
- Implemented JWT-based authentication, role-based access control, and third-party API integrations (payment, maps, notifications) across multiple client platforms.
- Managed client relationships, sprint timelines, and code reviews independently delivering all projects on schedule with zero post-launch critical defects reported.

Digisailor *Sep 2022 - Feb 2025*
Full Stack Developer

- Contributed to full SDLC delivery of 4+ production applications including a Visitor Management System, Hospital Management System, and an AI-powered platform (React, Node.js, PostgreSQL, OpenAI).
- Introduced pre-sprint scope alignment sessions with product managers, cutting average feature rework from 2 iterations to 1 and reducing mid-sprint requirement changes across 4+ delivered applications.
- Adopted Angular 18, TypeScript, Prisma ORM, and TypeORM within active project timelines, integrating new tools without disrupting

- PostgreSQL
- TypeORM, Prisma
- Git / GitHub
- OpenAI
- Supabase
- Vercel

delivery schedules.

- Maintained a consistent on-time delivery record across 2.5 years with zero sprint spillovers flagged in retrospectives while supporting testing, deployment, and post-launch bug resolution.

Projects

Portray 360 - 5 Elements

Technologies: React.js, Node.js, Tailwind CSS, MySQL, Python, OpenAI. AI-powered interactive platform with a Python middleware layer handling OpenAI prompt engineering and response processing between the React frontend and API endpoints.

Visitor Management System

Technologies: Node.js, Express.js, TypeScript, PostgreSQL, Prisma ORM, TypeORM. Secure visitor lifecycle platform with check-in/check-out workflows, role-based access across various user roles, and a PostgreSQL-backed audit trail with full TypeScript type safety.

Hospital Management System

Technologies: Node.js, Express.js, TypeScript, PostgreSQL, Prisma ORM. Multi-module hospital platform covering patient registration, doctor scheduling, and staff administration across various roles (admin, doctor, nurse) with Prisma-managed schema migrations.

Resume Builder Web Application

Technologies: React.js, Node.js, Express.js, MongoDB. MERN-stack resume builder with live form-driven editing, multiple template previews, client-side PDF export, and persistent MongoDB storage via RESTful Express API.

Meerasa's Interview Prep – Interview Preparation Web Application

Technologies: React.js, Node.js, Express.js, PostgreSQL, Supabase, Tailwind CSS, Vite. Full-stack interview prep platform with JWT auth, protected routes, real-time global search, per-user progress tracking via Supabase — sub-2s load times on Vercel.

https://meerasa-interview-app.vercel.app/

Agen Healthcare

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose. Healthcare platform for patient registration, appointment workflows, and staff management across 2 user roles with Mongoose-modelled data and a dynamic React UI.

TANSARWA

Technologies: WordPress, React.js, Node.js, MongoDB, SMTP. Digital membership platform with member registration, admin approval workflow, HD ID card PDF generation, automated email delivery, and a secure admin dashboard live in production.
